

NCR RealPOS™ 15" LED Display

Looking for a flexible retail-ready display that can provide information for either cashiers or consumers?

YES

The NCR RealPOS 15" LED Display delivers the information needed by today's cashiers and consumers

Built to be leveraged as a cashier interface or as a consumer-facing display, the NCR RealPOS 15" LED Display keeps everyone informed. Whether providing application interaction for the cashier with the optional touchscreen or displaying sophisticated graphics and multimedia content to the customer, this flexible, retail-hardened display provides an ideal interface for your point-of-sale solution.

- **Keep your customers informed**

The full-size graphical display allows you to present a scrolling receipt with detailed transaction data as well as advertisements, personalized product promotions and loyalty information to enhance the customer shopping experience. In addition, with its advanced LED technology, this bright, high-contrast display delivers crisp images while consuming less energy than older bulb backlight displays.

- **Intuitive touchscreen interface**

With the optional capacitive touchscreen, cashiers can interact directly with the device, making it easier to navigate the application and perform tasks quickly during checkout to improve productivity. Capacitive touch technology also delivers fast response times with enhanced durability and accuracy and reduces unintentional touches that are prevalent with other touch technologies.

- **Retail-hardened for demanding environments**

Comprehensive environmental and compatibility testing along with strict manufacturing standards provide you with confidence that your display will keep working despite long hours in an unforgiving retail environment. Software on-screen display (OSD) controls also add to the retail-hardening process by eliminating cashier and consumer tampering since there are no physical buttons—a must for any retail business.

For more information, visit www.ncr.com, or email retail@ncr.com.
