

Enterprise Touch Handheld Computer

EF400

Powerful & Pocket-Sized
industrial mobility

As a demonstrated market leader, Bluebird is known for innovating the full-touch technology before consumer smartphones took advantage of the advancement

This mission critical, full-touch mobile computer brings true mobility in enterprise class, which has enterprise class durability and functionality

EF400

**Powerful & pocket-sized true mobility,
industrial class durability and complete
functionality**

9 EF400 Features

slim form factor

portable LCD size

TankSmith™ ruggedness

multi OS support

lightning fast data capture

extended battery
longer battery cycle

simple & easy PTT
communication

excellent communication
and network connectivity

optimized camera for
industrial demands

→|**slim**|← lightweight

slim form factor

Weighing only 200g with standard battery, this device has been designed ergonomically to ensure comfort even after prolonged use. It also fits right in one hand making EF400 perfect for mobile operations.

CORNING® GORILLA® GLASS 3

portable LCD size

Built to last in tough environments, the EF400's display has diverse features to make your operation a smooth and convenient process. Featuring a 4" HD display, it is encased in Corning® Gorilla Glass® 3 with NDR (native damage resistance) and anti-fingerprint sealing. Furthermore, it has sun glare protection and can be operated equally well with a stylus pen or industrial gloves.

TankTM Smith

TankSmith Ruggedness

Bluebird's products guarantee top-notch quality by incorporating the proprietary TankSmith™ technology. All components are designed with industrial use in mind and have been tested in the field to eliminate any possible operational failures. In addition, components will not be discontinued for the next 5 to 7 years to ensure availability and support.

Along with solid particle and liquid ingress protection, the EF400 is purpose-built to withstand rigors of harsh industrial environments.

android  Windows

multi OS support

The EF400 has many choices for OS, which includes Windows 8.1, 10 or android 5.1. Customized OS support by Bluebird's dedicated team will guide you from installation phase unto maximum working capacity to serve you with the most reliable environment for your business to flourish.

lightning fast scanning

EF400's receptive scanners allow high recognition rate and is able to capture and process data at rapid speed. Additionally, all the integrated scanning components offer a wide range of data capturing options, resulting in faster work flow for your staff.

extended battery
longer battery cycle

The EF400 displays an extreme power saving design and low power consumption processor. The standard battery delivers 3000mAh.

simple and easy PTT

With a simple, specifically designed PTT button control, one-to-one or one-to-multiple communication is possible. Real-time voice transmission is free using the IP net (TCO). The EF400 has well-defined sound and technical noise canceling that provides crystal clear audio.

excellent communication and network connectivity

Whether indoor or outdoor, you can use it anywhere. Our product provides exceptional 3G and LTE network and processing speed with WLAN 802.11 a/b/g/n with BT 4.0 LE.

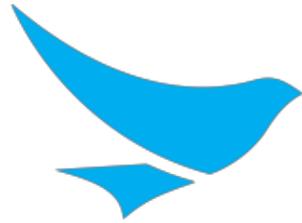

13.0 Megapixel

optimized camera for industrial demands

A 13.0 megapixel camera with autofocus optimizes industrial imaging solution and performance speed. We provide just what our customers need.
